TROPICAL CYCLONE BULLETIN NR. 1
Tropical Depression LUIS

Issued at 11:00 PM, 01 August 2026
Valid for broadcast until the next bulletin at 5:00 AM tomorrow.

THE LOW PRESSURE AREA EAST OF INFANTA, QUEZON DEVELOPED INTO TROPICAL DEPRESSION LUIS.

Location of Center (10:00 PM)

The center of Tropical Depression LUIS was estimated based on all available data at **360 km East of Daet, Camarines Norte (14.5°N, 126.3°E).**

Intensity

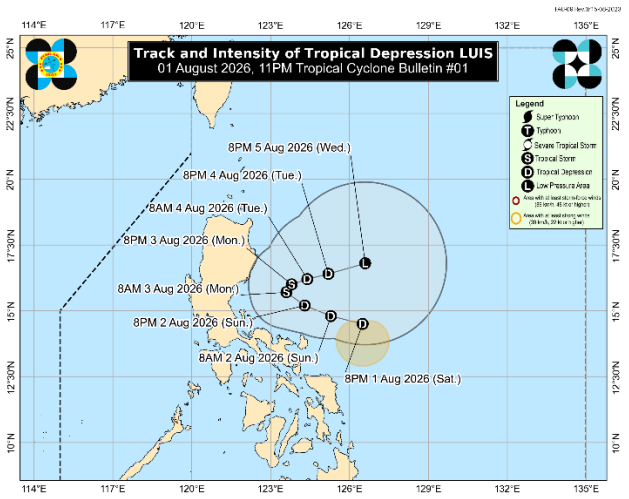
Maximum sustained winds of **45 km/h** near the center, gustiness of up to **55 km/h**, and central pressure of **1004 hPa.**

Present Movement

Westward at 15 km/h

Extent of Tropical Cyclone Winds

Strong winds extend outwards up to **150 km** from the center



TRACK AND INTENSITY FORECAST

Date and Time	Center Position			Intensity		Movement dir. and speed (km/h)
	Lat. (°N)	Lon. (°E)	Location	MSW (km/h)	Cat.	
12-Hour Forecast 8:00 AM 02 August 2026	14.8	125.3	390 km East of Infanta, Quezon	55	TD	WNW 10
24-Hour Forecast 8:00 PM 02 August 2026	15.2	124.3	295 km East Southeast of Baler, Aurora	55	TD	WNW 10
36-Hour Forecast 8:00 AM 03 August 2026	15.7	123.6	210 km East of Baler, Aurora	65	TS	NW 10
48-Hour Forecast 8:00 PM 03 August 2026	16.0	123.8	180 km East of Casiguran, Aurora	65	TS	NNE Slowly
60-Hour Forecast 8:00 AM 04 August 2026	16.2	124.4	245 km East of Casiguran, Aurora	55	TD	ENE Slowly
72-Hour Forecast 8:00 PM 04 August 2026	16.4	125.2	330 km East of Casiguran, Aurora	45	TD	ENE Slowly
96-Hour Forecast 8:00 PM 05 August 2026	16.8	126.6	525 km East of Echague, Isabela	-	LOW	ENE Slowly

TROPICAL CYCLONE BULLETIN NR. 1
Tropical Depression LUIS
Issued at 11:00 PM, 01 August 2026
Valid for broadcast until the next bulletin at 5:00 AM tomorrow.

TROPICAL CYCLONE WIND SIGNALS (TCWS) IN EFFECT			
TCWS No.	**Luzon**	**Visayas**	**Mindanao**
1 Wind threat: **Strong winds**	**Pollilo Islands, the eastern portion of Camarines Norte** (Daet, Talisay, Paracale, Jose Panganiban, Capalonga, Vinzons), **and the northern portion of Catanduanes** (Pandan, Caramoran, Bagamanoc, Panganiban)	-	-
	Warning lead time: **36 hours** Range of wind speeds: **39 to 61 km/h (Beaufort 6 to 7)** Potential impacts of winds: **Minimal to minor threat to life and property**		

OTHER HAZARDS AFFECTING LAND AREAS

Heavy Rainfall Outlook

Refer to **Weather Advisory No. 1 issued at 11:00 PM today** for the heavy rainfall outlook due to TC LUIS.

Severe Winds

The wind signals warn the public of the general wind threat over an area due to the tropical cyclone. Local winds may be slightly stronger/enhanced in coastal and upland/mountainous areas exposed to winds. Winds are less strong in areas sheltered from the prevailing wind direction.

- **Minimal to minor impacts** from strong winds are possible within any of the areas under Wind Signal No. 1.

The Southwest Monsoon and the periphery of LUIS will bring **strong to gale-force gusts** over the following areas (especially in coastal and upland areas exposed to winds):

- **Tomorrow (02 August):** Marinduque, Romblon, Caluya Islands, Siquijor, Southern Leyte, Camiguin, and Dinagat Islands.
- **Monday (03 August):** Most of Luzon and Visayas, Lanao del Norte, Camiguin, Surigao del Norte, and Dinagat Islands.

TROPICAL CYCLONE BULLETIN NR. 1
Tropical Depression LUIS
Issued at 11:00 PM, 01 August 2026
Valid for broadcast until the next bulletin at 5:00 AM tomorrow.

HAZARDS AFFECTING COASTAL WATERS

24-Hour Sea Condition Outlook

Up to moderate to rough seas over the following coastal waters:

- **Up to 2.5 m:** The eastern seaboard of Davao Oriental.
- **Up to 2.0 m:** The southern seaboard of Davao Oriental; the southeastern seaboard of Davao Occidental.
- **Mariners of motorbancas and similarly sized vessels are advised to take precautionary measures while venturing out to sea and, if possible, avoid navigation under these conditions**.

Other coastal waters have forecast wave heights of less than 2.0 m.

TRACK AND INTENSITY OUTLOOK

- **It must be emphasized that heavy rainfall and severe winds may still be experienced in localities outside the landfall point and the forecast confidence cone. Refer to "Other Hazards affecting Land Areas" for more details. Furthermore, the track may still shift within the limit of the forecast confidence cone.**
- LUIS is forecast to decelerate while moving west northwestward until tomorrow before turning east northeastward for the remaining forecast period. On the forecast track, the center of LUIS will remain over the Philippine Sea. However, a westward shift of the forecast track will result to a landfall scenario or close approach to Northern or Central Luzon
- LUIS will likely remain as a tropical depression in the next 24 hours. By Monday (03 August), the tropical cyclone is forecast to intensify into a tropical storm while moving over the sea east of Central Luzon. As it begins to move generally northeastward, a weakening trend will likely begin and will be downgraded to remnant low by Wednesday (05 August).

Considering these developments, the public and disaster risk reduction and management offices concerned are advised to take all necessary measures to protect life and property. Persons living in areas identified to be highly or very highly susceptible to these hazards are advised to follow evacuation and other instructions from local officials. **For heavy rainfall warnings, thunderstorm/rainfall advisories, and other severe weather information specific to your area, please monitor products issued by your local PAGASA Regional Services Division.**

The next tropical cyclone bulletin will be issued at 5:00 AM tomorrow.
